

Joe Conti | COO, VP Client Service

1624 Market St.

Denver, CO 80202

Ph: (720) - 295 - 5797

E: jconti@eventsquid.com

To Whom It May Concern:

Coalfire Labs was engaged during the period of April 27, 2020 through May 1, 2020 to perform third party independent security testing for Eventsquid. The security testing included penetration tests against the defined client systems to proactively discover flaws, weaknesses, and vulnerabilities. Testing for this project was done in accordance with Information Security Best Practices. Coalfire follows a penetration testing methodology that aligns to industry best practice and specific guidance including the following:

- NIST SP 800-115 Technical Guide to Information Security Testing and Assessment Federal Information (<http://csrc.nist.gov/publications/nistpubs/800-115/SP800-115.pdf>)
- OWASP Top Ten https://www.owasp.org/index.php/Category:OWASP_Top_Ten_Project & https://www.owasp.org/index.php/OWASP_Mobile_Security_Project (<http://www.owasp.org>)
- Penetration Testing Execution Standard (PTES) (<http://www.pentest-standard.org>)

The objective of this service was to identify and safely exploit vulnerabilities which could lead to critical infrastructure service interruption, destruction of facilities or compromise of sensitive systems and data. By providing details on successful attack scenarios and specific remediation guidance, Coalfire's intent is to help Eventsquid protect its business-critical systems, networks and data.

A penetration test report with all details regarding discovered vulnerabilities was provided to Eventsquid. During the engagement, Coalfire identified vulnerabilities that could result in account takeovers and the disclosure of personally identifiable information. Remediation activities were conducted by Coalfire. Accordingly, the risk of compromise based on the web application (on eventsquid.com and related private label sites) attack scenario was remediated by Eventsquid immediately following the report delivery.

If there are any questions regarding this engagement, please feel free to contact me directly.
